Task 1 – Web Application QA & Debug Report

Submitted By:

Praveen Kumar

Application Tested:

OrangeHRM Demo Application

Testing Type:

Manual Functional & Validation Testing

S.no	Title	Steps to Reproduc	Expected	Actual	Severity	Suspected Cause
1	No feedback displayed for invalid login attempt	1. Open OrangeHRM login page 2. Enter valid username and incorrect password 3. Click Login	Application should display an “Invalid Credentials” message or proper feedback.	No visible response or feedback is displayed after clicking Login.	Medium	Missing frontend error handling or failed API response not properly displayed.

2	Search functionality lacks “No Results Found” feedback	1. Login to the application 2. Enter random/non-existing text in the search bar 3. Observe the search behavior	Application should display “No Results Found” or relevant feedback.	Application remains unchanged without any response or indication.	Medium	Missing empty-state handling in search functionality.
3	Employee first name field accepts numeric values without validation	1. Navigate to PIM → Add Employee 2. Enter “12345” in First Name field 3. Enter valid Last Name 4. Click Save	System should reject numeric-only values in name fields.	Employee record is saved successfully with numeric first name.	High	Missing frontend/backend validation for alphabetic-only input fields.
4	Employee first name field accepts special characters without validation	1. Navigate to PIM → Add Employee 2. Enter “@@@@" in First Name field 3. Enter valid Last Name 4. Click Save	System should reject special characters in employee name field.	Employee record is saved successfully with special characters.	High	Missing input sanitization and validation rules.
5	Logged-out user can access dashboard using browser back button	1. Login successfully 2. Logout from the application 3. Press browser back button	User should not access authenticated pages after logout.	Previously authenticated dashboard becomes accessible again.	High	Improper session invalidation or missing cache-control handling after logout.
